Senior Scientist Systems Biology

What you can expect:

As Senior Scientist Systems Biology you will be part of an international team of scientists. In this team you will be an expert in the mining and interpretation of experimental data derived from multiple -omics platforms. You will drive the development of innovative systems biology data analysis methods. You will write and present reports to colleagues in Belgium, Germany and the US. As an experienced scientist, you will participate in collaborations with academia.

What we expect:

You have a PhD in Systems Biology, Bioinformatics, Computational Biology or Plant Molecular Biology. You are an expert in the mining and interpretation of plant biological data. You have experience with the analysis of biological networks. You combine your knowledge of the design and analysis of research experiments with hands-on experience with bioinformatic tools and databases. You are entrepreneurial and you enjoy working in a multidisciplinary international team.

We offer:

Responsibility from day one in a cutting-edge research environment. On-the-job training as part of a committed team. Competitive compensation including attractive benefits as well as excellent career opportunities in an international company.

Expect to be surprised by the exciting range of career opportunities at BASF.
