Job Offer
January 2016

Mind the Byte, the bioinformatics company specializing in computational drug discovery using a pay-per-use SaaS platform (software as a service) **has opened a new position**:

Bioinformatician

We are looking for a highly motivated and proactive candidate for the Torres Quevedo program, with a great desire to learn and participate in an innovative and growing environment. Candidate will be working with Mind the Byte's scientific team in a **personalized medicine project**.

That position is conditioned on obtaining a Torres Quevedo project on the TQ2015 call for proposals.

Requirements

- PhD in Bioinformatics and experience on omics data analysis and management
- Experience in Python and R software development. Knowledge of other programming languages and Python sciencific (Pandas, Numpy, SciPy) is a plus.
- Knowledge of SQL and noSQL (mongoDB) databases is a plus
- Experience in working on Linux Systems
- Experience or knowledge of cloud environments (Amazon Web Services) is a plus.
- Fluent English. Spanish/Catalan are a plus.

We offer

- 3-year full time contract (conditioned on obtaining a Torres Quevedo project on the TQ2015 call for proposals).
- Flexible working time.
- Salary according to pay scales of Mind the Byte and depending of the experience.
- An exciting and growing environment to learn and develop scientific cloud solutions.

If you are interested, please send your CV and cover letter to hr@mindthebyte.com before February 12th.
