JUNE 7, 2024

JOIN BIG DATA IN BIOLOGY EDUCATION SYMPOSIUM

Data-intensive world

Thanks to modern technology, life sciences are evolving into a data-intensive world. Big data and Artificial Intelligence permeate every aspect of this field. At the School of Life Sciences and Technology, we strive to innovate by using novel techniques to revolutionize education and work fields.

Share experiences

Together, we co-create the next generation of research technicians equipped with cutting-edge skills in big data and techniques. Experts and students will share experiences and views on investing in 'dry-lab' skills at this seminar, informing the development of future-proof researchers together with the work field.

Preliminary schedule

09:30 - 10:00h Welcome and introduction
10:00 - 11:25h Biotechnology and Bioinformatics & AI and Bioinformatics
11:25 - 12:00h Coffee break
12:00 - 12:40h Presentations Microbiology and Bioinformatics
12:40 - 14:00h Lunch and poster session
14:00 - 15:00h Workshops Troubleshooting Nanopore & Applied AI
15:00 - 16:00h Poster Award and drinks
