

## Intern Bioinformatician fulltime

### About Spadix

Spadix, founded in 2018, is a contract research laboratory specialized in genomic research. We offer a wide range of Next Generation Sequencing services for the plant breeding industry. Our services include genomics, transcriptomics, marker assisted breeding technologies, quality control services and bioinformatics. Spadix is located at the Bio Science Park in Leiden, the Netherlands.

### About the position

Due to our continued growth we have an exciting opportunity for a highly motivated **Intern Bioinformatician** willing to work on the development of a Bioinformatic pipeline supporting one of Spadix's technology platforms.

### We are looking for

A highly driven motivated candidate with knowledge of Python, Linux and NGS technologies. Additional knowledge of or feeling for plant genomics, Perl, R, distributed source code version control systems (Git or Mercurial) are of benefit.

As an **Intern Bioinformatician** you are amongst others responsible for the development of an analysis pipeline needed to support one of Spadix's technology platforms.

### Your profile

- BSc/MSc student in bioinformatics or related study
- Available for a period of 5-9 months
- Feeling for pipeline development

### We offer

A challenging fulltime position in a young and growing high tech company. Internship compensation depends on the qualification of the candidate.

### Interested?

Please send a motivation letter and C.V. to Richard Feron (CSO) via [Richard.Feron@spadix.nl](mailto:Richard.Feron@spadix.nl).

Apply before April 6, 2020
