

# **PhD Position in Glycobioinformatics**

at the German Cancer Research Center in Heidelberg

The EuroGlycanArrays training network is setup in the emerging field of glycomics and gives young scientists a unique opportunity to work on their PhD in a large interdisciplinary consortium of internationally known scientists. Here we offer a 3-year PhD position at the German Cancer Research Center, one of the world-class research institutions in Germany. The research project of the thesis covers aspects of protein-carbohydrate interaction and glycobioinformatics. Therefore the candidate must have a strong background in structural biology and excellent computer skills.

We are looking for someone with a strong background in structural biology and chemistry, excellent computer skills; experience in computer programming is desirable but not mandatory.
