

**Job title : postdoctoral research assistant-proteomics (bioinformatics)**

**Person of contact : Laurence Lins (Dr.)**

**location : Université de Liège, Gembloux Agro Bio Tech, CBMN**

**website : <http://www.fsagx.ac.be/bp/>**

#### Job description

The candidate should have an experience in proteomics (bioinformatics). She/he will be involved in a federal project on two years in the analysis of the protein-protein interaction networks in a plant (Arabidopsis)-biological agent (bacteria or aphids) system. This project involves six research groups of the Gembloux university (part of University of Liège). The candidate will have to interact with those groups.

Duration of the project: two years-beginning at 01/01/2011

#### profile

Experience in proteome mapping ('omics field) is an advantage. A PhD thesis in that field would be an advantage.

#### Application form

Applications in the form of a CV and covering letter including the name and address of two referees should be sent to the following address mail :
