

PhD position in computational biology, University of Freiburg

Within the Freiburg Initiative for Systems Biology (FRISYS, <http://frisys.de>) a PhD position (TV-L E13 50%) is available. The successful candidate will be associated with the group of PD Dr. Stefan Rensing (<http://plantco.de>) at the Faculty of Biology of the University of Freiburg.

We expect applications from candidates with

- a master or diploma in Bioinformatics, Computer Science or comparable education
- programming skills, preferably in Perl
- proven ability for team work
- good knowledge of sequence and relational databases
- good English communication skills

Experience with next generation sequencing, grid computing and computer administration is advantageous.

We offer

- a challenging project embedded in a cooperative research network
- an excellent scientific environment in one of the nicest German cities
- state of the art infrastructure and research objectives

The University of Freiburg is an equal opportunity employer.

Please send your application by May 12th as a single PDF to stefan.rensing@biologie.uni-freiburg.de.
