## About.

---

Earlham Institute are proud to host two prestigious conferences in one – The Genome 10K biannual conference for the Genome 10K project – assembling a genomic zoo to capture genetic diversity of vertebrate species to support worldwide conservation efforts – and the Genome Science meeting – a successful annual meeting exploring advances in genomic technologies and computational biology and their applications across the biomedical sciences.

We have an exciting programme packed full of renowned speakers, current hot topics for discussion, continuing professional development and training sessions. On top of this there will be ample networking opportunities, such as the conference dinner and social mixer events to really help bring together these fantastic communities of leading researchers.

### Registration fees

Standard Early Bird **£250**  
Student Early Bird **£150**  
Day Delegate Early Bird **£70** (per day)

Standard Late **£330**  
Student Late **£200**  
Day Delegate Late **£100** (per day)
