

nature biotechnology

Assistant Editor

Nature Biotechnology seeks an Assistant Editor for its editorial team based in New York. The journal is specifically looking for candidates with expertise in computational biology and systems analysis.

Members of the editorial team evaluate manuscripts, oversee the peer review process, commission and edit secondary materials such as Reviews, and write short pieces and editorials for the journal. The successful applicant will attend scientific meetings and visit laboratories to maintain contact with the international scientific community. The position will play a key role in consolidating *Nature Biotechnology's* presence and authority in the computational biology field.

Ideally, candidates should have experience working with computational systems as but a broader interest and understanding of biology is also important. Excellent communication skills and a willingness and ability to learn new fields are a must. Applicants should have completed a Ph.D. in the biological sciences.

To apply, an interested candidate should submit a curriculum vitae, a short (500-1000 words) News and Views-style article on an exciting and newsworthy recent development in an area of computational biology, and a cover letter explaining their interest in the position to Human Resources Department, Nature Publishing Group.

All applications should be sent via email to: admin@natureny.com.

Please place "Assistant Editor *Nature Biotechnology*:" in the subject line. All applicants will be reviewed upon receipt with a close date of December 25, 2007.
